Budget Visualization

You are to produce an alternative story form that visualizes for your readers at *Madison Commons* some aspect of Gov. Walker's proposed state budget. The visualization should include *at least* three pieces of data (i.e. the UW System budget over four budget cycles, the top four areas of spending, the top four areas of cuts, etc.). If the story form you produce does not stand on its own or with a short lede to get the audience into your piece, you should write a short sidebar to accompany it.

Turn it in (via link if necessary) via Learn@UW by Feb. 19 at 5:00 p.m.

This is part of your government reporting grade.
